

The Glo Lift and Slide (LS) Door is designed with quality and purpose. They are custom crafted to meet a variety of functional and aesthetic requirements while also delivering excellent thermal performance. European hardware, advanced technology, in multiple configurations creates an unparalleled experience.

The larger thermal break, triple pane glazing and durable framing of the Lift and Slide Door achieves a greater level of energy performance in a modern aluminum frame.

Thermal performance R-5 (Uw -0.20).  
Glazing options are available with SHGC from 0.28-0.60
